

**LUXEMBOURG
GREEN EXCHANGE**
by Luxembourg Stock Exchange

Steering the maritime sector towards a sustainable future

With around 90% of world trade carried out by the international maritime industry, shipping is in many ways responsible for driving our global economy. As the world moves towards a more sustainable tomorrow, reducing the environmental impact of shipping is critical.

Using our expertise to facilitate the green transition

Home to the Luxembourg Green Exchange (LGX), the world's first and leading sustainable finance platform, the Luxembourg Stock Exchange (LuxSE) is uniquely positioned at the crossroads between marine finance and sustainable finance.

As the world's leading exchange for sustainable bonds from the shipping sector by deal face value, our role is to facilitate the transition of the shipping industry, and help industry leaders meet the new demands and expectations of consumers, regulators, and investors.

How we can help you grow & diversify your investor base

LGX Assistance Services has been developed as a flexible resource for issuers interested in issuing sustainable bonds in a timely and cost-effective manner. Our team of sustainable finance experts will closely assist you with the issuance process by providing support with the structuring and review of the framework, providing peer comparison, shaping the post-issuance allocation and impact reporting.

What sets us apart

- ✓ Close collaboration with industry regulators and standard-setting bodies
- ✓ World's leading exchange for sustainable shipping by deal face value
- ✓ At the heart of Luxembourg's green shipping ecosystem
- ✓ Access to a broad ESG investor base through dedicated shipping events
